Blood Pressure & Medication Log for Seniors

Copyright © 2026 Bytebuz Press. All rights reserved.

No part of this publication may be reproduced, distributed, or transmitted in any form without the prior written permission of the publisher, except for brief quotations.

This book is a personal record-keeping tool. It does not provide medical advice and is not a substitute for professional diagnosis or treatment. Always consult a qualified health provider with questions about a medical condition.

How to Use This Log

1. Measure at the same times each day — once in the morning before medication, once in the evening. Sit quietly for five minutes first, feet flat on the floor, arm supported at heart level.
2. Write each reading in the weekly log. One page is one week, and the book is undated, so you can start any day you like.
3. Every four weeks, fill in the Monthly Review page. Plot your evening readings on the chart to see your trend at a glance.
4. Before each doctor visit, complete a Doctor Visit page. Bring this book with you — your doctor will love you for it.

Blood Pressure Categories

Reference chart (American Heart Association)

Category	Systolic (top number)		Diastolic (bottom number)
Normal	Below 120	and	Below 80
Elevated	120 – 129	and	Below 80
High — Stage 1	130 – 139	or	80 – 89
High — Stage 2	140 or higher	or	90 or higher
Crisis — call your doctor	Above 180	and/or	Above 120

These ranges are general guidelines. Your doctor may set different targets for you — write them on the first page and follow your doctor's advice.
