This book is a personal record-keeping tool. It does not provide medical advice and is not a substitute for professional diagnosis or treatment. Always consult a qualified health provider with questions about a medical condition.

How to Use This Planner

This planner keeps everything about your loved one's care in one place — so nothing gets forgotten, and anyone who steps in can pick up exactly where you left off.

Start with the Care Profile and Medication List so the essential facts are always at the front of the book. Then use one Daily Log page per day: vitals, medications given, meals, personal care, and handoff notes for the next caregiver or family member.

Every week there is a check-in page for the person the care system always forgets: you. Two minutes a week. Don't skip it.

Before every medical appointment, fill in an Appointment page — the questions you prepare are the ones that get answered.
