How to Use This Journal

Recovery is measured in small differences — a little less pain than Tuesday, a few more steps than last week. Day to day you can't feel the progress. On paper, you can see it.

Fill in one Daily Recovery page per day: pain scores morning and evening, medications, wound care, movement, and one win — however small. At the end of each week, the Weekly Milestones page shows you how far you've come.

Before we start: complete the My Surgery page, then sit down with your discharge instructions and copy your care team's warning signs into the Warning Signs page. That page is yours to fill — every surgery is different, and your team's list is the one that counts.

Bring this book to every follow-up. Precise answers about pain, medications, and mobility get you better care than 'fine, I guess.'
